DataAutomation: Your Premier Integration Partner

Since 2015, DataAutomation has been at the forefront of providing expert integration services, specializing in connecting everything with an API and exploring non-API integrations upon request. With a focus on **REST APIs** and a strong foothold in the **e-commerce sector**, we've successfully empowered over **300 clients**, including being platinum integration partners with industry giants like **ShipStation, TikTok Shops, Shopify, KatanaMRP, Extensiv, WooCommerce, Quickbooks Online, and Quickbooks Desktop**.

Why Choose DataAutomation?

- **Expertise & Experience**: Our seasoned team is well-versed in delivering top-notch integration solutions, evidenced by our platinum partnerships and extensive client base.

- **Customer-Centric**: We pride ourselves on exceptional customer service, ensuring clarity, support, and accountability at every step.

- **Innovative Solutions**: Offering our proprietary PHP platform, **STEPS**, we're equipped to thoughtfully innovate and tailor solutions to your unique needs.

- **Core Values**: At DataAutomation, we live by our principles—embracing challenges with honesty, supporting each other with kindness, innovating thoughtfully, ensuring accountability, and infusing playfulness into our work.

Our Process

1. **Initial Consultation**: It all starts with a sales call, where we'll **wireframe your process** to understand your needs. This includes gather information about which systems you need to connect and how the data needs to flow between both systems. We will ask you to show us how you're doing the process manually now so that we can identify the best way to automate your processes. It's helpful if all those involved in the systems can attend the meeting.

2. **Project Scoping**: We'll craft a detailed proposal outlining how we can help, the scope, and deliverables. The main part of the deliverable will be the Miro board. That will be our source of truth during the build process. **Pricing can be found here.**

3. **Execution**: Upon agreement, we'll commence work, aiming to complete projects within **4-6 weeks**. You will get a slack channel to use during setup and depending on your monthly commitment that channel may continue after your project is live.

4. **SLAs for support requests**

Getting Started

Ready to streamline your operations with seamless integrations? Reach out to us at **integrations@dataautomation.com** with a brief summary of your systems that you need to connect and objectives. Let's connect your world, smarter, we're focused on **taking the busyness out of business. http://www.dataautomation.com**
